

Hosting agreement for researchers in Sweden

Appendix to application

This hosting agreement should be used for researchers from outside the EU, EEA or Switzerland invited by a research funding body (university, institution, company, etc.) to conduct research in Sweden for a period of over three months. The research funding body has to be approved under the Act on approval of research organisations to host visiting researchers (2008:290). The research has to be the main purpose of the stay in Sweden.

The hosting agreement is a prerequisite for the research funding body to be able to receive the researcher and for the researcher to be able to obtain a residence permit. The agreement constitutes part of the researcher's application for a residence permit to conduct research or when applying for an extension to their stay. Through the agreement, the research funding body undertakes to receive the researcher and the research undertakes to conduct the research project. Provisions regarding hosting agreements are included in the Swedish Act on Approval of Research Organisations to Host Visiting Researchers.

The agreement must be signed by both the researcher and of a by a competent representative from the research funding body. Note that if information or a signature is missing, it will take longer to process the application for residence permit. Send the signed hosting agreement to the researcher who has to submit it along with their application for a residence permit.

You can find the form, together with further information, at www.migrationsverket.se. Please complete the form on your computer, as this makes it easier for us to process the case.

Note that anyone who has been admitted to doctoral studies in Sweden to earn their PhD must apply for a residence permit as a student. Anyone admitted to doctoral studies in a different country who will conduct part of their studies in Sweden must instead apply for a residence permit for visitors.
